

Proven Products

Tested at Gulf Spill Sites

Standard Residential Use -- spray bottle (3% dilution)

HOA & Facility Management Use -- one gallon container (5% or 10% dilution)

Marine / Industrial Concentrate -- 1 Liter 100% EcoClean @ 5% dilution makes 20+ liters

Advantages:

- Harmless Environmental Impact
- Transparent, odorless and non-flammable
- Non-electrostatic
- Harmless to rubber
- Difficult to emulsify
- Will not support microbial decomposition
- Easily removes carbon, nicotine, oil and fat
- Surfaces resist dust accumulation
- Surfaces resist organic growth
- Gentle to skin and clothes
- Cleaning effectiveness may be enhanced by warming or by using a pressurized spray.

Descriptions:

- Most effective heated over 120 degrees and using a pressurized system
- Enzymatic (once in the water) **Eco-Clean** keeps on cleaning
- **Eco-Clean** is non-electrostatic - perfect for use around computers and electronics
- **Eco-Clean** degrades to oxygen and hydrogen when subjected to freezing temps, so no long lasting effects in the environment
- **Eco-Clean** is gentle to skin (doctors in Japan use in place of alcohol for cleaning hands)
- Can be used with sponges, cloth, or sprays
- **Eco-Clean** is a non-chemical product. This works by means of hydroxyl ionization which creates microclusters that are active at the water's surface making the water self-flushing.
- Objects to be cleaned may be immersed in **Eco-Clean**
- **Eco-Clean** is safe for cleaning animals and marine life.
- **Eco-Clean** contains NO SURFACTANTS OR HORMONE SIMILES

Applications:

Most effective with pressurized systems -- outside cleaning

Safe around children, plants and pets -- use as carpet cleaner, grill cleaner and 100's of other uses.

Oil and engine clean-up solutions
